**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

I) **Group I, claim(s) 1-7**, drawn to a system and method for remote tuning over a network.

II) **Group II, claim(s) 8-19**, drawn to a system and method for synchronizing clocks across a network

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group I lacks corresponding special technical features “detecting packets containing the embedded time stamp; computing an adjusted time stamp based on the embedded timestamp and a precision local clock; incorporating the adjusted timestamp into the at least a portion of the plurality of packets containing the embedded timestamp; and transmitting the at least a portion of the plurality of packets to the network” required by the invention of Group II.

The invention of Group II lacks corresponding special technical features “receiving a user request indicative of a desire to view at least one of the plurality of channels; filtering the

received signal to obtain a user signal corresponding to the at least one of the plurality of channels; and transmitting the user signal to the user via the network” required by the invention of Group I.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
